

Measuring with Inches

Directions:

1. Cut out the inch ruler and choose an object.
2. Estimate the length of the object in inches and record your estimate. (be sure to include the unit)
3. Measure and record the actual measurement and record that measurement.
4. Find and record the difference.

| Object | Estimate | Actual Measurement | Difference |
|-----------------|----------|--------------------|------------|
| Example: pencil | 9 in. | 7 in. | 2 in. |
